### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

**Group I.** Claims 1-21, drawn to an electronic device, classified in class 257, subclass 2.

**Group II.** Claims 22-31, drawn to a memory device, classified in class 365, subclass 163.

2. The inventions are distinct, each from the other because of the following reasons:

The inventions II and I are related as a memory device including a memory array of phase change memory element and process made. The inventions are distinct if either or both of the following can be shown: (1) that an electronic device including an element of chalcogenenic material as claimed can be used to make other and materially different with a device or (2) that the memory device including a memory array of phase change memory element as claimed can be made by another and materially different with a electronic device (MPEP § 806.05(f)). In the instant case (3) a memory array of phase change memory element each including a chalcogenic element as claimed can be made by another different with a temperature detection circuit coupled to the control circuit including a sense resistor of chalcogenic material.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Robert Iannucci on 16 June 2005 to discuss the restriction issue of this application, but was unable to reach.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventor ship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventor ship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined though the requirement be traversed (37 CFR 1.143),

### ***Conclusion***
